Sir:

In response to the Official Action dated November 15, 2001, using clean copies of the Claims and also a marked-up version of such, kindly amend the Application as follows:

In the Claims (Clean copy as amended)

part C1
1. (Amended) A method for producing an aromatic compound isomer substituted with alkyl group(s) and/or halogen atom(s), through adsorptive separation by the use of a zeolite-containing adsorbent and a desorbent, wherein the desorbent is, after having been processed for removing impurities from it by a method selected from distillation, purging, or absorption to a solid absorbent to achieve a level below 1,000 ppm by weight, supplied to the adsorptive separation step.

B2
7. (Amended) A method for producing an aromatic compound isomer substituted with alkyl group(s) and/or halogen atom(s), through adsorptive separation by the use of a zeolite-containing adsorbent and a desorbent, wherein the desorbent is, after having been processed for removing oxygen-containing or high boiling point compound impurities from it by a method selected from distillation, purging, or absorption to a solid absorbent to
